Issued and fully paid share capital <u>Ordinary Shares</u> Balance at 1 July 2018 and 30 September 2018	1,199,851,018	1,856.1

As at 30 September 2018, the number of ordinary shares in issue was 1,199,851,018 of which 16,185,885 were held by the Company as treasury shares (30 September 2017: 1,199,851,018 ordinary shares of which 17,318,177 were held as treasury shares). The share capital was \$1,856.1 million. The treasury shares held represents 1.4% (30 September 2017: 1.5%) of the total number of issued shares (excluding treasury shares).

There is no subsidiary holdings of the Company as at 30 September 2018 and 30 September 2017.

Employee Share Option Plan

As at 30 September 2018, there were no share options of the Company outstanding (30 September 2017: 7,885,655). During the financial year, no options (30 September 2017: Nil) were exercised under the Singapore Airlines Limited Employee Share Option Plan, which comprises the Senior Executive Share Option Scheme for senior executives and the Employee Share Option Scheme for all other employees.

Restricted Share Plan ("RSP") and Performance Share Plan ("PSP")

In addition to the Employee Share Option Plan, senior management staff are entitled to two share-based incentive plans, the RSP and PSP, which were first approved by the shareholders of the Company on 28 July 2005 and expired on 27 July 2015. On 30 July 2014, the shareholders of the Company approved the RSP 2014 and PSP 2014, which replaced the RSP and PSP respectively.

Depending on the achievement of pre-determined targets over the performance periods for the RSP and PSP, the final number of restricted shares and performance shares awarded could range between 0% and 150% of the initial grant of the restricted shares and between 0% and 200% of the initial grant of the performance shares.

As at 30 September 2018, the number of outstanding shares granted under the Company's RSP and PSP were 2,070,455 (30 September 2017: 1,856,523) and 744,322 respectively (30 September 2017: 698,026).

2 Whether the figures have been audited, or reviewed, and in accordance with which auditing standard or practice.

The financial statements have not been audited or reviewed by our auditors.

3 Where the figures have been audited or reviewed, the auditor's report (including any qualifications or emphasis of matter).

Not applicable.

4 Whether the same accounting policies and methods of computation as in the issuer's most recently audited annual financial statements have been applied.

As required by the listing rules of the Singapore Exchange, the Group has applied Singapore Financial Reporting Standards (International) ("SFRS(I)") with effect from 1 April 2018. The Group's financial statements for the financial year ending 31 March 2019 will be prepared in accordance with SFRS(I), and International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board.

The Group has applied the same accounting policies and methods of computation in the financial statements for the current reporting period as that of the audited financial statements for the year ended 31 March 2018, except the adoption of new/revised IFRS applicable for the financial period beginning 1 April 2018 as follows:

- IFRS 1 First-time Adoption of International Financial Reporting Standards
- IFRS 15 Revenue from Contracts with Customers

(i) Application of IFRS 1 optional exemptions

IFRS 1 requires that the Group applies IFRS on a retrospective basis, as if such accounting policy had always been applied. If there are changes to accounting policies arising from new or amended standards effective 1 April 2018, restatement of comparatives may be required because IFRS 1 requires both the opening balance sheet and comparative information to be prepared using the most current accounting policies. IFRS 1 provides mandatory exceptions and optional exemptions from retrospective application, which are often different from those specific transition provisions in individual FRSs applied to the FRS financial statements. The Group has elected various optional exemptions in IFRS 1, including those set out below which impact the financial statements:

a) Fair value as deemed cost exemption for property, plant and equipment

The Group has elected to regard the fair values of certain aircraft and aircraft spares as their deemed cost at the date of transition to IFRS 1 on 1 April 2017.

b) Foreign currency translation reserve

The Group has elected to reset the foreign currency translation reserve for all foreign operations to zero as at the date of transition to IFRS 1 on 1 April 2017.

c) Fair value as deemed cost exemption for investments in associated companies

The Company has elected to regard the fair value of its investment in Virgin Australia Holdings Limited, an associated company, as its deemed cost in its separate financial statements at the date of transition to IFRS 1 on 1 April 2017.

(ii) IFRS 15 Revenue from Contracts with Customers

IFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognised. It also introduces new cost guidance which requires certain costs of obtaining and fulfilling contracts to be recognised as separate assets when specified criteria are met.

The Group adopted IFRS 15 using the retrospective approach with practical expedients.

The impact on adoption of IFRS 15 is that recognition of revenue associated with ancillary services has been deferred from transaction date to flight date. This is in line with recognition of revenue associated with the carriage of passengers.

(iii) Impact on the comparatives for the financial statements of this reporting quarter on adoption of IFRS 1 and IFRS 15

GROUP FINANCIAL PERFORMANCE

First Half 2018/19

The SIA Group reported an operating profit of \$426 million in the first half of the 2018/19 financial year, a decline of \$336 million (-44.1%) from last year's restated profit of \$762 million¹. Excluding one-off items of \$175 million², however, the drop in operating profit would have been \$161 million (-27.4%). The decline was a consequence of a \$379 million (+20.4%) increase in fuel costs.

Flown revenue for the Group rose by \$422 million, contributed by passenger flown revenue (+\$346 million or +5.8%) and cargo flown revenue (\$76 million or +7.4%). Passenger flown revenue was lifted by an 8.8% increase in traffic, outpacing growth in capacity of 5.4%, driving passenger load factor for the Group airlines in aggregate to rise 2.6% points to 83.6%. Passenger unit revenue (measured in revenue per available seat-kilometres) grew 1.3% as transformation efforts yielded positive results. Cargo flown revenue was \$76 million (+7.4%) higher on stronger yields (+9.7%), partially offset by lower loads carried (-2.3%).

Revenue contribution from engineering services fell \$19 million (-7.9%) on lower airframe and fleet management activities. Together with other miscellaneous changes in revenue, and in the absence of non-recurring revenue, Group revenue improved by \$195 million (+2.5%) to \$7,907 million.

Expenditure for the Group increased \$531 million to \$7,481 million (+7.6%), predominantly led by an increase in net fuel cost (+\$379 million or +20.4%). Fuel cost before hedging for the Group rose by \$692 million, mainly due to a US\$26 per barrel (+39.5%) increase in average jet fuel price, partially alleviated by hedging gains versus losses last year (+\$313 million). Ex-fuel costs were \$152 million (+3.0%) higher, well within the growth in capacity largely contributed by passenger airlines (+5.4%), due to the success of continuing efforts to improve cost efficiency.

The Group recognised an increase in share of losses (\$97 million) of its associated companies for the period, mostly due to Virgin Australia (VAH), whose results were impacted by major accounting adjustments following a review of its asset values in accordance with accounting standards. As a result of the review, Virgin Australia de-recognised approximately A\$452 million (\$456 million) in deferred tax assets and made a A\$121 million (\$122 million) impairment of the assets of the Virgin Australia International business. The SIA Group recognised its share of losses (\$116 million) arising from these non-cash adjustments.

¹ As required by the Singapore Exchange listing rules, the Group has adopted International Financial Reporting Standards ("IFRS") with effect from 1 April 2018. This has resulted in a reduction in book values for aircraft and aircraft spares. Prior year comparatives have been restated as required by the transition requirements. The consequential reduction in depreciation expense for the April-September 2017 quarter was \$248 million. For comparison, the IFRS impact for the April-September 2018 quarter was \$222 million.

² Non-recurring revenue items were in relation to KrisFlyer breakage rate adjustments and compensation for changes in aircraft delivery slots (\$175 million) recognised in the first quarter of the financial year 2017/18.

Group net profit fell to \$196 million, \$435 million (-68.9%) lower than a year ago. The following table summarises the major one-off items affecting the Group results for the first half of both financial years:

	1 st Half FY2018/19 \$ million	1 st Half FY2017/18 \$ million
Reported Net Profit	196	631
<i>Exclude Non-recurring Items:</i>		
<i>KrisFlyer Breakage and Aircraft Compensation</i>	-	(175)
<i>Share of VAH's Accounting Adjustments</i>	116	-
<i>Tax Impact</i>	-	30
Adjusted Net Profit	312	486

Excluding the impact of these non-recurring items, adjusted net profit fell to \$312 million, \$174 million (-35.8%) lower than a year ago. This reduction was the result of a weaker operating performance (-\$161 million), despite strong growth in flown revenue, mainly due to the \$379 million increase in net fuel costs.

First Half Operating Results of Main Companies

The operating results of the main companies in the Group for the first half of the financial year were as follows. The weaker performance for airlines was largely due to higher fuel cost.

	1 st Half FY2018/19 \$ million	1 st Half FY2017/18 \$ million
Operating Profit		
Parent Airline Company ³	418	689
SilkAir	(3)	22
Scoot	(10)	5
SIA Engineering	22	39

Operating profit for the Parent Airline Company declined \$271 million to \$418 million, as the increase in expenditure and absence of non-recurring revenue (\$175 million) outpaced growth in passenger and cargo flown revenue (+\$277 million). Passenger flown revenue rose \$201 million (+4.2%), with unit revenue improving by 1.2%. Passenger load factor rose 2.7 percentage points to 83.6% on a 6.0% gain in passenger carriage (measured in revenue passenger-kilometres), and capacity growth of 2.6% (measured in available seat-kilometres). Cargo flown revenue grew \$76 million (+7.4%) driven by stronger yields (+9.7%), partially offset by lower loads (-2.3%).

Expenditure was up \$348 million (+6.2%), primarily due to higher net fuel cost (\$279 million). The effect of significantly higher fuel prices (+\$597 million) was partially mitigated by fuel hedging gains (-\$256 million) and a weaker US dollar (-\$57 million). The rise in ex-fuel costs (+1.7%) was partly contributed by increases in staff costs from higher staff strength, and sales costs on the growth in passenger traffic.

SilkAir reported a half-year loss of \$3 million, a reversal from last year's profit of \$22 million. Total revenue rose \$13 million (+2.8%), lifted by 10.5% growth in passenger carriage. However, expenditure was up \$38 million, mostly on higher net fuel cost (+\$20 million) and ex-fuel variable costs, contributed by a 6.6% increase in capacity. Unit revenue fell 3.6%, while passenger load factor rose 2.7 percentage points to 75.8%.

Scoot recorded an operating loss of \$10 million, a deterioration of \$15 million year-on-year. Revenue increased \$139 million (+19.2%), as passenger traffic grew 19.4%. Unit revenue rose 2.1%. However, expenditure surged \$154 million (+21.4%), mainly from higher net fuel cost (+\$80 million) and ex-fuel costs from a larger fleet and an expanded operation (capacity rose 16.3%), which outpaced revenue growth. Passenger load factor increased 2.2 percentage points to 86.4%.

³ SIA Cargo is a division within the Parent Airline Company with effect from 1 April 2018. Prior year comparatives have been adjusted to account for its re-integration.

Operating profit for SIA Engineering fell to \$22 million, a decline of \$17 million from a year ago, mainly due to a reduction in revenue on lower airframe and fleet management activities. The deterioration was partially cushioned by lower material and subcontract services costs, as well as foreign exchange gains against losses last year.

Second Quarter 2018/19

Operating profit for the second quarter contracted \$124 million to \$233 million (-34.7%), as expenditure increased \$338 million (+9.7%), mainly from fuel and capacity injection, outweighing revenue growth of \$214 million (+5.6%). Net fuel cost for the Group rose \$226 million (+24.3%), while ex-fuel costs were \$112 million (+4.4%) higher, in tandem with the Group's capacity growth of 5.3%.

The operating results of the main companies in the Group for the second quarter of the financial year were as follows:

	2 nd Quarter FY2018/19 \$ million	2 nd Quarter FY2017/18 \$ million
Operating Profit		
Parent Airline Company ³	237	319
SilkAir	(3)	14
Scoot	(11)	2
SIA Engineering	11	20

Operating performance for the Group airlines in the second quarter was weaker, despite gains in flown revenue, mostly as a result of higher fuel cost. The Parent Airline Company reported a \$133 million gain (+4.2%) in revenue on the back of passenger carriage growth (+6.5%), but this was offset by higher fuel (+\$167 million) and other expenditure.

SilkAir and Scoot reported operating losses, as the increase in fuel and expansion costs outpaced revenue growth. SilkAir reported a \$5 million improvement (+2.1%) in passenger flown revenue on a 6.0% increase in passenger traffic, but it was insufficient to mitigate a \$10 million rise in net fuel cost, amongst other cost increases. Passenger revenue for Scoot rose \$79 million (+23.4%), driven by a 21.5% increase in carriage on capacity growth of 18.3%, but this was overshadowed by higher fuel and other costs.

Group net profit for the second quarter fell to \$56 million, \$237 million (-80.9%) lower year-on-year. The following table highlights the major one-off item affecting the Group results for the second quarter of the financial year:

	2 nd Quarter FY2018/19 \$ million	2 nd Quarter FY2017/18 \$ million
Reported Net Profit	56	293
<i>Exclude Non-recurring Item:</i>		
<i>Share of VAH's Accounting Adjustments</i>	116	-
Adjusted Net Profit	172	293

Excluding the impact of the non-recurring item during the second quarter, the adjusted net profit for the period is \$121 million lower (-41.3%) against last year. The reduction is primarily the result of a weaker operating performance for the period (-\$124 million), despite strong flown revenue growth, mainly due to the \$226 million increase in net fuel cost.

BALANCE SHEET REVIEW
(September 2018 vs March 2018)

Equity attributable to owners of the company increased by \$1,192 million (9.3%) to \$14,052 million as at 30 September 2018 largely due to the fair value movement on cash flow hedges (+\$1,305 million) and net profit for the period (+\$196 million), partially offset by FY2017/18 final dividend paid (-\$355 million). The fair value movement on cash flow hedges of \$1,304 million was mainly attributable to fair value gain on outstanding fuel hedges (+\$1,079 million) and foreign exchange derivative contracts (+\$232 million).

Total Group assets increased by \$2,912 million (11.2%) to \$28,805 million. The increase was mainly attributable to an increase in property, plant and equipment (+\$2,197 million), and derivative assets (+\$1,361 million), partially offset by a reduction in cash and bank balances (-\$586 million). The reduction in cash balances arose primarily from capital expenditure (-\$3,030 million) partially funded by proceeds from borrowings (+\$1,380 million) and cash flows from operations (+\$1,272 million).

Total Group liabilities increased by \$1,719 million (13.6%) to \$14,383 million as at 30 September 2018, primarily arising from the increase in borrowings (+\$1,354 million), deferred taxes (+\$371 million), sales in advance of carriage (+\$195 million) and trade creditors (+\$73 million), partially offset by a decrease in derivative liabilities (-\$198 million).

The Group's negative working capital arose largely from the collection of cash in advance of services provided. Excluding the liability under "sales in advance of carriage", the Group's working capital would be \$743 million as at 30 September 2018.

OUTLOOK

Bookings in the coming months are expected to be stronger year-on-year. However, headwinds continue to persist in the form of cost pressures arising from significantly elevated fuel prices compared to a year ago, as well as keen competition in key operating markets. Notwithstanding concerns over global trade tensions, cargo demand in the near term is expected to remain healthy during the seasonal peak.

The Group continues to hedge its fuel requirements. For the second half of the financial year, the Group has hedged 58% of its fuel requirements in MOPS at a weighted average price of USD71, against the current MOPS price of USD87. Longer-dated Brent hedges with maturities extending to the financial year FY2023/24 cover up to 46% of the Group's projected annual fuel consumption, at average prices ranging from USD56 to USD64 per barrel, against the prevailing Brent fuel price of USD73 per barrel⁴.

Amid continuing challenges in the operating environment, the SIA Group remains committed to its three-year Transformation programme to enhance customer experience, grow revenue and improve operational efficiency. The programme has been producing positive results in all these areas to date.

The recent introduction of new non-stop services to Los Angeles and New York is a significant milestone, providing customers with more convenient travel options, and strengthening the Airline's competitiveness as well as the Singapore hub. This will be further enhanced next year with the addition of Singapore-Seattle as the fourth non-stop route between Singapore and the important US market.

The Group has also been significantly enhancing its digital capabilities through a multi-phased programme which has seen great progress so far. The programme encompasses company-wide training programmes and participation by staff in innovation projects across the Group; building digital capabilities through extensive IT-related recruitment and a shift to agile delivery of IT projects; large-scale investment in IT infrastructure; and increased collaboration with global tech leaders, start-ups and research institutes.
