Group Financial Results

Key Takeaways

Q3 FY2023/24

Net Profit rose 4.9% to \$658.7 million, while Operating Profit fell 19.3% to \$609.0 million

- Robust passenger demand on the back of a strong year-end peak drove a record quarterly Group revenue of \$5,081.9 million
- Passenger flown revenue posted \$398.2 million increase, while Cargo revenue fell \$302.7 million as yields remained under pressure
- Expenditure rose 9.3%, less than capacity increase, driven by both fuel and non-fuel costs.
- Improvement in net profit despite lower operating profit, largely driven by lower tax expense, share of profits of associated companies against a loss last year, surplus on disposal of aircraft, spares, and spare engines (versus a loss last year), higher net interest income.

9M FY2023/24

Building on record 1H performance, Net Profit rose 35.0% YoY to a record \$2,099.8 million for the nine months to December 2023

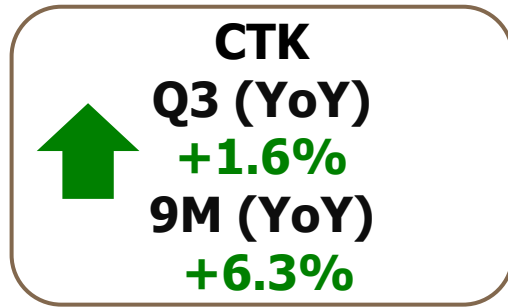

9-month Operating Profit came in at a record \$2,162.8 million, an improvement of 8.7% YoY

Passenger yields under pressure as global capacity restoration leads to heightened competition

Geopolitical and macroeconomic concerns, inflationary pressures, and supply chain constraints may pose headwinds to airline industry

The Group expects to return to pre-pandemic passenger capacity levels within FY2024/25
