APRIL 2023 OPERATING RESULTS

In April 2023, the Singapore Airlines (SIA) Group continued to see strong passenger traffic and load factors across all route regions. This was supported by the robust leisure demand during the Easter holiday. East Asia continued to see healthy growth in demand to China, Japan, South Korea, and Taiwan.

Group passenger capacity was up 36.7% year-on-year. SIA and Scoot carried a combined 2.7 million passengers in April 2023 (+85.5% year-on-year). Group passenger load factor (PLF) was 88.3% (+15.6 percentage points year-on-year). SIA's PLF was 87.5%, while Scoot's PLF was 90.8%.

The cargo load factor of 50.7% was 16.0 percentage points lower year-on-year. Cargo loads declined by 11.2% year-on-year due to weaker demand, while capacity expanded by 16.8% as increased passenger services resulted in higher bellyhold capacity.

During the month, Scoot resumed services to Haikou, Ningbo, and Xi'an. At the end of April 2023, the Group's passenger network¹ covered 112 destinations in 36 countries and territories. SIA served 74 destinations, while Scoot served 61 destinations. The cargo network¹ comprised 118 destinations in 38 countries and territories.
