## MARCH 2026 OPERATING RESULTS

In March 2026, the Singapore Airlines (SIA) Group's passenger traffic rose 14.7% year-on-year, outpacing the passenger capacity increase of 7.2%. The Group's passenger load factor (PLF) was 90.6%, with SIA and Scoot posting monthly PLFs of 90.3% (a new monthly PLF record) and 91.7% respectively.

The robust passenger traffic growth was supported by the increase in demand for air travel ahead of the Easter holiday in early April, as well as spillover Europe-bound traffic as capacity through Middle East air hubs was affected by the ongoing Middle East conflict.

Combined passenger carriage increased 14.9% year-on-year to 3.8 million passengers, setting a new monthly record for the Group. This brings the total passenger carriage for FY2025/26 to 42.4 million, 7.7% higher than the previous record of 39.4 million in FY2024/25.

On the cargo front, cargo loads rose 2.4% year-on-year, against capacity decrease of 1.3%, partly supported by spillover volumes amid disruptions to Middle East airspace. Cargo load factor increased 2.1 percentage points to 59.0%.

During the month, Scoot launched services to Tokyo (Haneda) in Japan. In view of the geopolitical situation in the Middle East, SIA and Scoot implemented rolling cancellation of its services to Dubai (the United Arab Emirates) and Jeddah (Saudi Arabia) respectively.

As of end-March 2026, the Group's passenger network<sup>1</sup> covered 134 destinations in 35 countries and territories. SIA served 77 destinations, while Scoot served 82 destinations. The cargo network<sup>1</sup> comprised 137 destinations in 36 countries and territories.
