APRIL 2016 OPERATING RESULTS

In April 2016, Singapore Airlines' systemwide passenger load factor (PLF) improved 1.8 percentage points to 77.1%. Passenger carriage (measured in revenue passenger kilometers) increased 1.9% compared to last year, against a 0.5% decrease in capacity (measured in available seat kilometers).

Comparing year-on-year, demand was boosted by East Asia routes primarily on the back of promotional activities. The competitive landscape continues to be challenging and promotional activities will continue in relevant markets.

SilkAir's systemwide passenger carriage grew 22.3% year-on-year, exceeding capacity growth of 16.2% in April 2016. Consequently, PLF improved by 3.7 percentage points to 72.9%. Growth in passenger carriage exceeded capacity growth for both the East Asia and Pacific region and the West Asia region, resulting in a 4.7 percentage-point and 0.2 percentage-point increase in PLF respectively.

Scout's systemwide PLF increased by 3.6 percentage points year-on-year to 85.5%, as growth in passenger carriage exceeded the increase in capacity. In April 2016, Scout took delivery of a 787 aircraft, bringing its total fleet size to 11 as at 30 April 2016.

Tigerair recorded a 2.4 percentage-point increase in PLF in the month of April 2016, as systemwide passenger carriage grew by 1.9%, against a 1.0% reduction in capacity.

Overall cargo load factor (CLF) was 1.3 percentage points higher with growth in cargo traffic (measured in freight-tonne-kilometres) of 8.5% exceeding overall capacity increase of 6.3%. East Asia, Europe and South West Pacific regions showed an improvement in load factor with demand outpacing capacity changes.
