Passenger loads continued to improve in November 2003, with total carriage higher than November 2002. Overall capacity (in Available Seat Kilometres) for the month was 4.3% lower than that of the same month last year.

SIA has injected additional capacity to selected destinations in Australia, New Zealand, India, Europe and South East and North Asia to cater to the year-end holiday demand.

Cargo capacity increased by 6% in November 2003. However, cargo traffic (measured by freight tonne-kilometre) fell 3.2%. The traffic decline was largely due to a decrease in traffic on the Europe and South West Pacific route regions. Both route regions continued to suffer from poor loads on the return journey.
