

VACCINATED TRAVEL LANE (VTL) FOR PASSENGERS ENTERING & TRANSITING THROUGH SINGAPORE

Am I eligible to fly on a VTL flight?

These requirements apply for all VTL flights arriving in Singapore on or after **19 October 2021** and VTL flights from South Korea on or after **15 November 2021**.

For flights arriving prior to 19 October please refer to either the [Germany VTL](#) or [Brunei VTL](#) requirements PDF.

Have you remained in Singapore and/or any VTL approved country for at least **14 days before departure?**

Any days spent in Singapore prior to arriving in a VTL country will count toward the 14 days.
Transiting through a country without leaving the airport is still considered part of travel history.

✓ 14 days or more

Are you fully vaccinated against Covid-19 with a PSAR or World Health Organisation Emergency Use Listing vaccine?

You must hold a digitally certifiable vaccination certificate¹ in English.
Mix of approved vaccines² is possible.
The final dose was administered at least 14 days prior to your intended date of entry into Singapore.
Fully recovered Covid-19 travellers are eligible, conditions apply³.

✓ Vaccinated

You are eligible!

Travellers entering or transiting through Singapore via a **VTL flight** must meet these **requirements**:

	Long-Term Pass Holder	Short-Term Visitor	Permanent Resident	Singapore Citizen	Transit Passengers

✗ Less than 14 days

✗ Not Vaccinated or Partially Vaccinated.
Includes any children, regardless of age, who are not vaccinated.

✗ You are not eligible.

Check general entry requirements.

⚠ Please note that a Vaccinated Travel Pass cannot be used to travel on a non-VTL Flight.

Transiting through Singapore?

There have been regulatory changes at Singapore Changi Airport. Travellers are advised to find out how these may impact their travel experience.

[Click to find out more](#)

¹Vaccination certificates issued in Singapore or any VTL country, the European Union Digital Covid Certificate (EUDCC) issued in European VTL countries, and the UK's National Health Service (NHS) Covid passes downloaded from the NHS mobile app. For travellers vaccinated in Canada and the USA, only vaccination certificates issued in the SMART Health Card (SHC) format by issuers in Canada and the USA on the Common Trust Network are accepted. CovPass or the International Certificate of Vaccination or Prophylaxis (ICVP), also known as the Carte Jaune or Yellow Card, will not be accepted as proof of vaccination. Vaccination certificates issued in South Korea will be accepted from 15 November 2021.

²To be considered fully vaccinated, travellers require two shots of an approved vaccine, or one shot of the Johnson & Johnson vaccine.

³Fully recovered Covid-19 travellers require an electronic copy or physical copy of an EUDCC Certificate for recovery from Covid-19 or a discharge memo issued in Singapore & above-mentioned acceptable vaccination certificate showing one dose of vaccination taken at least 28 days after the date when the traveller first tested positive and at least 14 days prior to arrival in Singapore.

⁴All PCR Test results to be received in English.

⁵VTP applications process is available for Brunei and Germany. South Korea VTP applications will be available from 8 November 2021, 10:00am(SGT). All other VTP applications will be available from 12 October 2021, 10:00am(SGT).

⁶Insurance Coverage for Covid-19 medical treatment and hospitalisation costs.
